

ABSTRACT

DETECTION AND/OR QUANTIFICATION METHOD OF A TARGET  
MOLECULE BY A BINDING WITH A CAPTURE MOLECULE FIXED ON  
5 THE SURFACE OF A DISC

The present invention is related to a method  
for the detection and/or the quantification of a target  
10 molecule by its binding with a non-cleavable capture molecule  
fixed on the surface of a disc comprising registered data.

The present invention is also related to a disc  
having fixed upon its surface a non-cleavable capture  
molecule, to its preparation process, and to a diagnostic  
15 and/or reading device of said disc or comprising said disc.
